-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### DETAILED ACTION

#### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 11-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Choi (US Patent No. 7,291,054) in view of Takeda et al. (US Patent No. 6,461,242).

Choi discloses a remote control transmitter (i.e. radio or infrared) for a toy car that includes a control stick (i.e. control shaft), a supporter, and a bearing section (see Figure 13, for example); a light source (54).

Choi does not disclose the control stick explicitly having the switches with pressing sections, elastic sections, and ribs.

substrate

Takeda et al. teach a control device having a control stick including switches with pressing sections, elastic sections, and ribs.

plurality of switches

It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide pressing sections, elastic sections, and ribs as taught by Takeda et al., since such a modification would provide an alternate switching arrangement.

Claim 18 is rejected under 35 U.S.C. 103(a) as being unpatentable over the references as applied to claim 11 above, and further in view of Yonezawa (US Patent No. 5,158,495).

The modified invention of Choi lacks a charging terminal and built-in power source.

Yonezawa teaches a toy vehicle controlled by a remote control transmitter and having a charging terminal and port for charging a built-in battery.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide a charging terminal and a built-in battery as taught by Yonezawa, since such a modification would provide a power source that is easily renewable.

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Urszula M. Cegielnik whose telephone number is 571-272-4420. The examiner can normally be reached on Monday through Friday, from 5:45AM-2:15PM.
